click on TortoiseGit → Apply Patch Serial Figure 2 50 Tortoise SVN : Good 'patch file' viewer? I've never found any, but the solution that I usually use is to simply apply the patch file to a pristine checkout of the tree, and then do a "regular" diff (my preferred tool is diffuse) to review the changes in context.. It is The default patch file viewer is messy (ie no side by side diff view etc).. I tried setting the path of beyondCompare exe in 'Settings->Unified Diff Viewer->custom', but beyond compare also behaves.
